

Options
for everyone

We believe in what we do.

We love what we create.

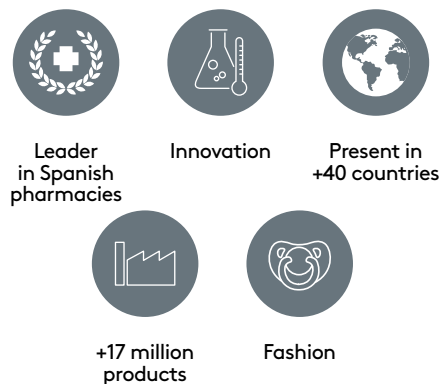

That's what drives us to keep offering the best products to thousands of families, taking each step with the future in mind, the place that future generations will occupy.

Because...

helping parents creating high-quality products and being responsible and sustainable means achieving
a more beautiful world.

Suavinex is a symbol of **quality, innovation and fashion**. We are a market leader and a top brand in the baby care and maternity sector. We are a solid, diversified brand with a clear international focus that is present in more than 40 countries, manufacturing more than 17 million products a year. Thanks to our constant search for the latest trends in fashion, design and technology and our intense efforts in terms of research and improvement, we are able to respond to the needs of our target.

We focus on offering **safe, top-quality products**. Our soothers and teats have the approval of the *Spanish Society of Paediatric Dentistry* and the recommendation of the *Italian Association of Specialists in Orthodontics*. We are members of the *Child Use and Care Articles Committee*, the body that is responsible for drawing up standards for small baby-care products in Europe. What is more, our soothers, clips and bottles are manufactured in the European Community, meaning that the whole process is controlled.

We are aware of our role in society as agents of change, and we are therefore committed to **society and the environment**, working actively to improve families' quality of life and happiness. Our commitment is based on opening spaces for dialogue, training and cooperation with the audiences with whom we interact and promoting equal opportunities, integration and a balance between family and professional life. We are also dedicated to high-quality, sustainable, efficient production at our different production facilities and headquarters.

Breast milk is the best food for the baby. It meets their nutritional, immunological and psychological needs; so much so that the World Health Organisation (WHO) recommends it for the first 2 years of life.

01. Breastfeeding

The breastfeeding range provides help for mums to express milk when going back to work, for health reasons or so that other people can be involved in feeding the baby, among other reasons.

ELECTRIC BREAST PUMP

SAP. 307309 + 307308

Ideal for regular pumping, without the need for manually pressing.

- INCLUDES:
- Electric breast pump
 - 3 breast milk storage bags with lid
 - 1 Zero.Zero™ bottle 120ml with adaptable flow teat (A)
 - Carrying bag

INNOVATION:
WITH DOUBLE REGULATION SYSTEM:

- Regulates speed
- Regulates suction strength

SILICONE NIPPLE SHIELDS

Size S - 2 units + storage box SAP. 304588

Size M - 2 units + storage box SAP. 304589

They help make it possible to continue breastfeeding despite sore or irritated nipples. Made from soft, thin silicone, they can hardly be noticed by the baby when nursing.

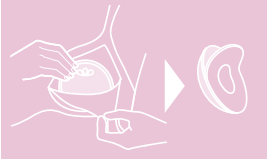

SET OF PROTECTIVE BREAST SHELLS + MILK COLLECTION SHELLS

2 units of each SAP. 400872

When placed inside the bra, the soft, flexible silicone pad fits comfortably against the breast.

The pad is easy to put on and take off.

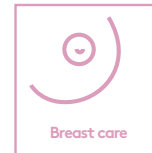

PROTECTIVE BREAST SHELLS coloured and with holes

→ They prevent clothing from chafing against the sensitive, delicate skin of the breast in cases of sore and/or cracked nipples.

MILK COLLECTION SHELLS colourless and without holes

→ They collect excess milk that leaks during breastfeeding. They are also very useful for mothers who produce too much milk.

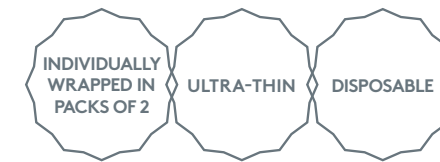

BREAST PADS

28 units SAP. 300027

60 units SAP. 300028

They are placed between breast and bra to soak up leaked milk and draw moisture away from the breasts, maintaining the skin's natural balance.

→ Made of cellulose from sustainable forests

*Internal comparative study carried out by the Suavinex Product Innovation team between Suavinex breast pads and other brands on the market, Spain 2017.

02.

Bottles + soothers + soother clips

Parents can choose from a great variety of designs, sizes, materials and functions in our products, which enables us to guarantee the well-being of the most demanding babies.

BACKED BY PEDIATRIC DENTISTS

The brand's soothers and teats have the seal of approval of the Spanish Society of Paediatric Dentistry and are recommended by the Italian Association of Specialists in Orthodontics.

Bottle teats

For those who opt for mixed feeding or for formula milk alone, choosing which teat to use with the bottle is crucial. Suavinex teats are designed to suit babies' needs at each stage of their growth.

SOFT AND FLEXIBLE

Made from materials that perfectly imitate the feel and motion of the mother's breast when sucking.

A HOST OF OPTIONS

We offer the possibility of choosing the shape of the teat: physiological, anatomical or round.

ANTI-COLIC SYSTEM

With an IMPROVED anti-colic valve* which helps to prevent hiccups and colic in newborn babies.

BACKED BY PEDIATRIC DENTISTS

The quality and design of the teat, whatever its shape and material, are optimal for correct development of the palate, as recognised by prestigious institutions:

- SPANISH SOCIETY OF PEDIATRIC DENTISTRY (SEOP)
- ITALIAN ASSOCIATION OF SPECIALISTS IN ORTHODONTICS (ASIO)

WIDE-NECK BOTTLE

The width of the neck and base make the bottle easy to prepare and clean, as well as making it more stable.

ERGONOMIC SHAPE

Makes it safer and more comfortable to grip during feeding.

*with the exception of the Zero.Zero teat

GUIDE

Based on the baby's **age**

	ONE SIZE	ONE SIZE	ONE SIZE	ONE SIZE	SIZE 1	SIZE 2
S SLOW FLOW	+0m	+0m	+0m		0-6m	
M MEDIUM FLOW	+0m	+3m			0-6m	+6m
L DENSE FLOW	+6m	+6m	+4m	+4m		+6m
3P 3-POSITION VARIABLE FLOW			+0m			
A ADAPTABLE FLOW	+0m					

Remember these are indicative guidelines. Babies develop at different rates.

ZERO.ZERO TEAT

For the Zero.Zero bottle

SLOW FLOW TEAT

Lets a limited flow of liquid through. Indicated for the first few days for milk, glucose or water feeds.

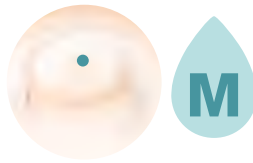

+0m One size Flow S [SILICONE](#) 2 units **SAP. 305907**

MEDIUM FLOW TEAT

Lets all types of medium-density liquids flow. Ideal for milk, juice and very thin purées.

+0m One size Flow M [SILICONE](#) 2 units **SAP. 305908**

DENSE FLOW TEAT

Its wide opening gives off thicks liquids.

+6m One size Flow L [SILICONE](#) 2 units **SAP. 306384**

ADAPTABLE FLOW TEAT

The flow is proportional to the suction: allows more or less liquid to flow depending on the strength with which the baby sucks.

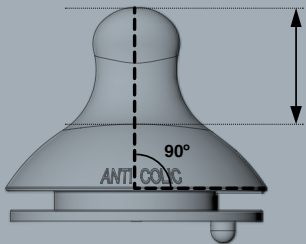

+0m One size Flow A [SILICONE](#) 2 units **SAP. 304585**

SPECIFICALLY
FOR
BREASTFED
BABIES

SX PRO™
PHYSIOLOGICAL
TEAT

Fits all Suavinex bottles
(except Zero.Zero bottle)

- Flat and symmetrical**
- Leaves enough space for the tongue to lie in its natural position.
- Long neck -20mm-**
- reaches the junction of the hard and soft palate.
- Slightly curved concave base**
- ensures the correct position of the mouth, tongue and jaw muscles.
- Neck centred in relation to the base**
- easiest for babies who hold the bottle on their own.
- Ultra-soft silicone and textured finish**
- mimics the texture and consistency of the mother's nipple.

SLOW FLOW

- Lets a limited flow of liquid through.
- Indicated for milk feeds during the first few days of life or for water later on².

+0m One size Flow S **SILICONE** 2 units **SAP. 307042**

MEDIUM FLOW

- Lets all types of medium-density liquids through.
- Ideal for milk, juice or water.

+3m One size Flow M **SILICONE** 2 units **SAP. 307043**

DENSE FLOW

- Lets very thin purées through.
- Ideal for older or hungry babies.

+6m One size Flow L **SILICONE** 2 units **SAP. 307043**

1. 36 interviewed in an internal study conducted by the Suavinex Product Innovation team, Spain 2020.
2. According to the AEP (Spanish Paediatric Association), it is recommended to administer water once the baby starts eating solid food.

ROUND TEAT

Fits all Suavinex bottles
(except Zero.Zero bottle)

SLOW FLOW

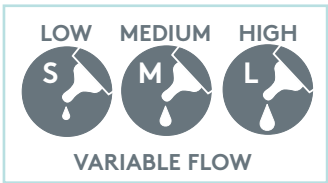

- Lets a limited flow of liquid through.
- Indicated for milk feeds during the first few days of life or for water later on*.

+0m One size Flow S **SILICONE** 2 units **SAP. 300840**

3-POSITION

Allows you to adapt the flow of liquid to the baby's needs or to the type of food simply by rotating the bottle.

+0m One size Variable flow **SILICONE** 2 units **SAP. 300142**

* How does the 3-POSITION TEAT work?

Place the desired flow symbol just below the nose according to the following instructions:

- -LOW: Ideal for the first few days and for giving water and/or glucose water.
- -MEDIUM: Ideal for milk, juice and very thin purées.
- -HIGH: The right position for thicker foods and hungry babies.

BABY FOOD

- Lets very thin purées through.
- Ideal for older or hungry babies.

+4m One size Flow L **SILICONE** 2 units **SAP. 300841**

ANATOMICAL TEAT

Fits all Suavinex bottles (except Zero.Zero™ bottle).

Mimics the shape of the oral cavity. Simulates the dome shape formed by the palate and tongue:

- palate: convex top
- tongue: flat underside

SLOW FLOW

- Lets a limited flow of liquid through.
- Indicated for milk feeds during the first few days of life or for water later on*.

0-6m Size 1 Flow S **SILICONE** 2 units **SAP. 300865**

MEDIUM FLOW

- Lets all types of medium-density liquids through.
- Ideal for milk, juice or water.

0-6m Size 1 Flow M **SILICONE** 2 units **SAP. 300866**
+6m Size 2 Flow M **SILICONE** 2 units **SAP. 300867**

DENSE FLOW

- Lets all types of medium-density liquids through.
- Ideal for milk, juice or water.

+6m Size 2 Flow L **SILICONE** 2 units **SAP. 300868**

SPOUT

Ideal transition from bottle to cup.

+4m One size **SILICONE** 1 unit **SAP. 300843**

*According to the AEP (Spanish Paediatric Association), it is recommended to administer water once the baby starts eating solid food.

*According to the AEP (Spanish Paediatric Association), it is recommended to administer water once the baby starts eating solid food.

Soothers

Non-nutritive suction on a soother has been shown to release endorphins, the so-called happiness hormone, which produces a pleasant soothing and relaxing feeling in the baby. Suavinex offers the possibility of choosing both the shape: anatomical or physiological. Choose the teat that best suits each baby's needs.

BACKED BY PEDIATRIC DENTISTS

The Spanish Society of Pediatric Dentistry and the Italian Association of Specialists in Orthodontics support our research, design and manufacture, as well as the quality controls that our soothers and teats undergo.

•ANATOMICAL TEAT

Mimics the shape of the oral cavity. Simulates the dome shape formed by the palate and tongue:

- palate: convex top
- tongue: flat underside

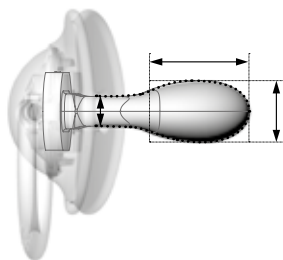

•PHYSIOLOGICAL TEAT

With its flat, symmetrical shape it is always correctly positioned in the baby's mouth, exerting minimum pressure on the roof of the mouth.

•SX PRO™ PHYSIOLOGICAL TEAT

With its flat, symmetrical shape, its thinner, wider neck and shorter, flatter head than the traditional physiological teat, it is designed not to invade the oral cavity and to give the baby the same sensation they experience in their natural/physiological state when not using a soother.

Thinner and wider²

- enables the mouth to remain almost completely closed.

Shorter head²

- helps the head of the teat bend against the roof.

Flatter symmetrical head²

- leaves enough space for the tongue to lie in its natural position.

Ultra-soft silicone and textured finish

- mimics the texture and consistency of the mother's nipple.

The Basics

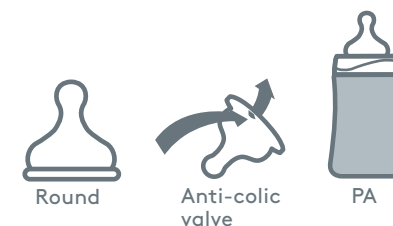

THREE COLOURS, ONE ATTITUDE.

A range of products for babies aged 0 to 18 month and beyond, which is fun, with a funky touch but, above all, functional. For practical families who don't need anything more than the basics without compromising on quality. A simple range with a lot of personality.

BASIC BOTTLE WITH ROUND TEAT

With anti-colic valve, it helps prevent the discomfort caused by swallowing air, such as hiccups and baby colic. Wide-neck bottle and ergonomic shape.

Gold Edition

IT'S ALL ABOUT GOLD!

Unique items with plenty of personality and their own identity, all under the same range named after the precious metal. Its design and range of colours are inspired by nature, combining attention to detail with the brand's romantic and poetic narrative.

PREMIUM GOLD BOTTLE

With SX Pro™ physiological silicone teat, which takes into account the particular characteristics of babies teeth and mouths as their upper and lower jaws develop.

Physiological

03. Teethers and rattles

Our range of teethers soothes the inevitable pain that comes with teething, and will also distract them and bring a smile to their face.

DIFFERENT MATERIALS AND TEXTURES

The combination of materials and textures strengthens new teeth and helps them break through the gum.

STIMULATES THE SENSES

DESIGNED FOR LITTLE HANDS

BUNNY SILICONE TEETHER

+0m SAP. 400700

It is lightweight and small, making it ideal to use during the first months when babies put everything in their mouth. Its patterned surface stimulates fine motor skills and helps relieve inflamed gums during the teething process.

RUBBER TEETHER

+0m SAP. 400267

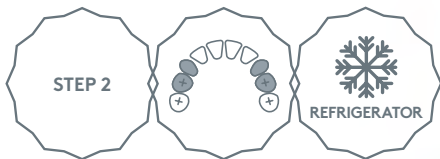

With rubber bubbles that massage the baby's gums.

CHILLED TEETHER

+4m SAP. 400268

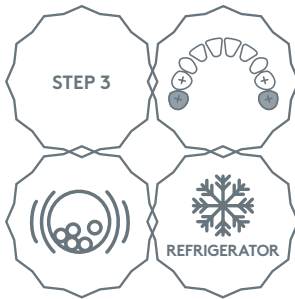

By cooling the water inside the teether it soothes inflamed gums. Thanks to the different surfaces and materials it strengthens new baby teeth.

EDUCATIONAL TEETHER

+6m SAP. 400269

The rattle's sounds and noises awaken baby's curiosity. By cooling the water inside the teether it soothes inflamed gums.

MUSICAL TEETHER

+0m SAP. 400187

Press the flower to hear a pleasant melody.

GALAXY RATTLE

+0m SAP. 400279

Small appliances

The Suavinex small appliances range assists families in the day-to-day care of their babies, providing innovative solutions to help them out during their children's first years of life. These appliances are easy to use and clean and are carefully designed to give parents peace of mind and save their time, allowing them to spend more time with their babies and make the most of their time together.

ELECTRIC STERILIZER

SAP. 400772

Sterilises soothers, feeding bottles and baby accessories, removing 99.9% of the germs and microorganisms.

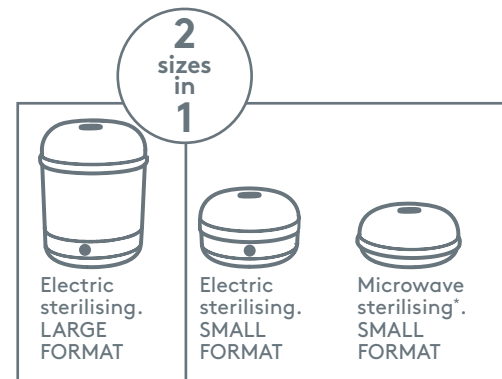

Sterilises in 6 minutes

Accessories sterile for up to 24 hours

Fits up to 6 bottles

*Measurements: 13cm high x 26cm wide x 20cm deep

BOTTLE WARMER

SAP. 400773

With 3-mode system allows you to use it with bottles of formula milk, as well as with jars of homogenised baby food or bottles/bags of breast milk.

Express mode: for formula milk

Jar mode: for baby food

Gentle mode: for breast milk

COOL MIST HUMIDIFIER

SAP. 400804

Helps maintain an adequate level of humidity in the baby's room using nebulised water (cool mist) that works by nebulising water using high-frequency vibrations (ultrasonic). The humidifier helps protect the airways and thus prevent irritation of the mucous membranes and throat.

Battery life all night long

For rooms measuring up to 15 m²

FOOD PROCESSOR

SAP. 400803

Prepare food for the baby the healthiest way, preserving all the nutrients in the food by steaming it. With its 5 functions, it can blend, heat, defrost and even sterilise small accessories. Steams while cook.

Stainless steel bowl

Main basket for cook

1. Steams

2. Heats

3. Defrosts

4. Blends

5. Sterilises

06.

Sterilising and cleaning

During the first months of the baby's life, it is recommendable to sterilise bottles, teats, soothers, toys, etc. and just about everything that goes in the baby's mouth to avoid tummy bugs.

MICROWAVE STERILISER

SAP. 300919

Allows you to sterilise up to 5 bottles and their accessories using intense steam in 4 minutes.
17 cm high x 26 cm wide x 26 cm deep

READY IN 4 MINUTES

INCLUDES TONGS

BOTTLE DRYING RACK

SAP. 400284

Long and short spikes for bottles, teats, beakers and soothers, small supports for internal bottle caps and curved surface to stop water logging.

EASY TO ASSEMBLE AND DISMANTLE

DETERGENT SPECIALLY FOR BOTTLES AND TEATS

500ml	1 unit	SAP. 400706
500ml	2units (double)	SAP. 401242

The detergent for bottles and teats thoroughly cleans the remains of milk, purées and juice. Very effective for cleaning breast pump parts and other accessories.

NEW FORMULA!

FORMULATED WITH UP TO 96% INGREDIENTS OF NATURAL ORIGIN*

DERMATOLOGICALLY TESTED

*% including water

DUCCIO

(PORTABLE SOOTHER STERILIZER)

SAP. 400817

Sterilises the soother without chemical agents in 3 minutes thanks to the use of ultraviolet (UV) light. It operates with a USB cable or with batteries.

UV ULTRAVIOLET RAYS

STERILISES IN 3MIN

TRAVEL FORMAT

07.

Hygiene and grooming

Bath time is a daily cleansing ritual, but it is also a great opportunity to spend time with mummy and daddy. Suavinex offers a range of products that help you turn that moment into a gratifying experience for all the family.

BRUSH & COMB

+0m **PINK** SAP. 400264
+0m **MINT** SAP. 400265
+0m **GREY** SAP. 400263

Round edges and soft, flexible bristles that respect the baby's scalp.

BATH THERMOMETER

+0m SAP. 400695

For accurately measuring the ideal bath water temperature. With sweet decorative ears.

NATURAL SPONGE

+0m **SMALL** SAP. 400025
+0m **MEDIUM** SAP. 300856
+0m **LARGE** SAP. 300857

Harvested from the ocean floor, these sponges are selected and prepared by hand.

NASAL ASPIRATOR

+0m SAP. 300075

Relieves uncomfortable mucus build-up thanks to its rubber bulb.

ANATOMICAL NASAL ASPIRATOR

+0m SAP. 400287

The mucus is sucked through the tube into the chamber, clearing the baby's nose.

REPLACEMENTS

+0m 10units SAP. 400287

BABY NAIL SCISSORS

+0m SAP. 300076

The rounded tips make them ideal for cutting your baby's nails.

BABY CARE ESSENTIALS SET

+0m SAP. 401211

A kit with 6 essential products to help with the delicate daily care that a baby needs from the first day.

- Brush
- Comb
- Finger toothbrush
- Scissors
- Nail file
- Nail clippers

08. Fragrances

Smell and the sense of smell are very important during the first months of your baby's life. Babies start to develop their olfactory memory from the moment they are born, creating a pleasant link with the environment. Suavinex has designed these low-alcohol content colognes for loveable moments.

LOW ALCOHOL CONTENT
Composition designed for the newborn.

PERFECT FOR BABIES AND MUMS
Share the same fragrance !

BABY COLOGNE

100ml SAP. 306962

For after bathing or to refresh baby at any time of day. With a pleasant touch of citrus fruit, white flowers and musk.

BABY COLOGNE MEMORIES

100ml SAP. 306786

A fragrance that complements the classic Baby Cologne. A scent of jasmine, orange blossom, white cedar wood, cashmere wood, musk and amber that is designed for babies, but also for the whole family. Light, but long-lasting.

09. *Cosmetics*

1st cosmetics range for babies and mamas with ingredients of natural origin in packaging made from renewable raw materials.

Because at Suavinex we're truly committed to the world that future generations will inherit, every day we choose more sustainable solutions without sacrificing quality and design.
